

PROFESSIONAL SUMMARY

Computer Systems Engineer and Software Developer with experience in full-stack development, database engineering, and game development. Specialized in building scalable, data-driven applications using PHP, Java, C#, and SQL, with strong expertise in relational database design, performance optimization, and backend architecture. Strong problem-solving mindset with experience in debugging, system optimization, and automation. Passionate about full-stack development, game development, databases, and artificial intelligence, with a focus on building efficient and scalable software solutions.

EXPERIENCE

Meridial by Invisible Freelance Software Engineer March 2026 - Present

- Designed and optimized relational database schemas, applying normalization and indexing techniques to improve query performance and ensure data integrity.
- Developed and integrated web application components, connecting frontend interfaces with backend services.
- Built automation scripts to streamline internal workflows, reducing manual processes and improving operational efficiency.
- Troubleshooted and resolved technical issues across applications and data pipelines to maintain system reliability.
- Implemented data validation and quality checks to ensure accuracy and consistency across dataset

Auxis Jr. Appeals Specialist Jul 2024 - Present

- Analyzed U.S. healthcare insurance documentation including UB-04, EOB, Face Sheets, and patient records to identify billing discrepancies and denied claim causes.
- Reviewed and validated medical, financial, and insurance data to ensure compliance with payer guidelines and regulatory standards.

Grupo Marta Full Stack Developer (Internship) Oct 2023 - Dec 2023

- Designed, developed, and deployed a full-stack survey web application to collect and analyze employee data across multiple companies.
- Built the front end (HTML, CSS, Java) and the back end (PHP, SQL), integrating an extensive relational database (MySQL) with normalized structures for efficient data storage and reporting.
- Implemented features for data entry, validation, and analytics, ensuring accuracy and usability for end users.
- In addition to the project, provided comprehensive IT infrastructure support to organizations such as Holiday Inn, Denny's, and Grupo Marta, including:
- Installation and maintenance of ESET antivirus solutions.
- Hardware and software troubleshooting across desktops and networks.
- Ensuring system stability, security, and optimal performance in daily operations.

PROJECTS

2D Game Developer (Personal Project) – Unity, C#

- Designed and developed core gameplay systems for a 2D battle royale game
- Implemented directional dash mechanics based on player orientation
- Developed combat systems (projectiles, cooldowns, abilities)
- Designed ships with distinct stats, abilities, and playstyles
- Created game maps with emphasis on balance, navigation, and combat dynamics
- Applied object-oriented programming principles to structure game logic
- Managed physics, events, and update cycles within Unity

EDUCATION

2018 - 2023 Colegio Técnico Profesional Abelardo Bonilla Baldares
Highschool Graduate

2021 - 2023 Colegio Técnico Profesional Abelardo Bonilla Baldares
Technician on Computer Science focused on Software Development

2024 - 2026 Universidad Autónoma de Centro América
Bachelor in Computer Systems Engineering

LANGUAGES

Spanish: Native
English: Advanced (C2 EF Test / C1 BELT Test)
Portuguese(BR): Intermediate (B1, currently learning)

TECHNICAL SKILLS

Software Development & Full-Stack Engineering

- Developed and maintained full-stack web applications using PHP, Java, C#, and SQL
- Designed and integrated REST APIs and backend services for scalable systems
- Built dynamic frontend interfaces and connected them with backend logic and databases
- Applied object-oriented programming (OOP) and clean architecture principles
- Used Git and CI/CD pipelines for version control and deployment workflows
- Implemented debugging, testing, and performance optimization techniques

Databases & Data Engineering

- Designed, normalized, and optimized relational databases using Oracle, MySQL, and SQL
- Developed PL/SQL stored procedures and implemented indexing strategies for performance
- Built and maintained data pipelines for data ingestion, transformation, and analytics
- Ensured data integrity, validation, and efficient query performance
- Experience with Oracle Autonomous Database, MySQL and Power BI

Additional Technical Experience

- Basic experience in IT support, system troubleshooting, and enterprise environments
- Familiarity with system security, access control, and endpoint protection

Game Development (Unity & C#)

- Developed a 2D spaceship combat game using Unity and C#
- Implemented gameplay systems including movement, directional dash, combat, and abilities
- Designed ships with unique stats, behaviors, and playstyles
- Created maps focused on gameplay balance and player interaction
- Structured modular scripts for scalable game architecture

CERTIFICATIONS / COURSES

Harvard – CS50 Introduction to Computer Science (2025)

Intensive course covering algorithms, data structures, memory management, C, Python, SQL, and web development. Focused on computational thinking and problem-solving through hands-on projects and weekly challenges.

Fortinet – Network Security Expert (2025)

Professional certification program focused on enterprise cybersecurity. Includes firewall configuration, threat detection, secure network design, and best practices for protecting digital infrastructure.

PI institute– Python Essentials (2026)

Foundational Python certification covering core programming concepts, data structures, control flow, functions, and scripting for software development and automation.

Oracle Cloud Infrastructure Foundations (In progress)

Professional certification program focused on Oracle Cloud Infrastructure. Covers fundamental cloud concepts, core OCI services, security, networking, and cost management. Provides essential skills to design, deploy, and manage enterprise workloads in Oracle Cloud.
