

PROFESSIONAL SUMMARY

Software Developer and Computer Systems Engineering student with experience in full-stack web development, database design, automation, and enterprise applications. Skilled in PHP, Python, Java, C#, SQL, and cloud technologies. Experienced in building scalable solutions, optimizing databases, and integrating frontend and backend systems. Interested in software engineering, AI, cloud computing, and data-driven applications.

EXPERIENCE

Meridial by Invisible Freelance Software Engineer March 2026 - Present

- Designed and optimized relational database schemas, applying normalization and indexing techniques to improve query performance and ensure data integrity
- Developed and integrated web application components, connecting frontend interfaces with backend services and APIs
- Built automation scripts using Python/SQL to streamline internal workflows, reducing manual processing and improving operational efficiency
- Troubleshooted and resolved issues across applications, backend services, and data pipelines to maintain system reliability
- Implemented data validation rules and quality checks to ensure accuracy and consistency across datasets

Auxis Jr. Appeals Specialist Jul 2024 - Present

- Analyzed U.S. healthcare insurance documentation including UB-04, EOB, Face Sheets, and patient records to identify billing discrepancies and denied claim causes.
- Reviewed and validated medical, financial, and insurance data to ensure compliance with payer guidelines and regulatory standards.

Grupo Marta Full Stack Developer (Internship) Oct 2023 - Dec 2023

- Lead the design, development, and deployment of a full-stack survey web application to collect and analyze employee data across multiple companies
- Built the frontend using HTML, CSS, and Java, and developed the backend with PHP and SQL
- Designed and implemented a normalized relational database in MySQL to ensure efficient data storage and reporting
- Developed features for data entry, validation, and analytics, improving data accuracy and usability for end users
- Integrated frontend and backend components to create a complete data-driven system
- Provided basic technical support to ensure system continuity, including software installation, troubleshooting, and infrastructure maintenance for client environments

PROJECTS

2D Game Developer (Personal Project) – Unity, C#

- Designed and developed core gameplay systems for a 2D battle royale game
- Implemented directional dash mechanics based on player orientation
- Developed combat systems (projectiles, cooldowns, abilities)
- Designed ships with distinct stats, abilities, and playstyles
- Created game maps with emphasis on balance, navigation, and combat dynamics
- Applied object-oriented programming principles to structure game logic
- Managed physics, events, and update cycles within Unity

TECHNICAL SKILLS

- Programming Languages: Python, Java, C# & PHP
- Web Technologies: HTML, CSS, JavaScript, & REST APIs
- Databases: MySQL, Oracle Database, SQL Server & PL/SQL
- Tools: Git, GitHub, Office, Power BI, Unity, Visual Studio Code & Visual Studio 2022
- Cloud and Integration: Oracle Cloud Infrastructure & Dell Boomi
- Methodologies: OOP, CI/CD, Agile Development & Database Design

EDUCATION

2018 - 2023 Colegio Técnico Profesional Abelardo Bonilla Baldares
Highschool Graduate

2021 - 2023 Colegio Técnico Profesional Abelardo Bonilla Baldares
Technician on Computer Science focused on Software Development

2024 - 2026 Universidad Autónoma de Centro América
Bachelor in Computer Systems Engineering

LANGUAGES

Spanish: Native
English: Advanced (C2 EF Test / C1 BELT Test)
Portuguese(BR): Intermediate (B1, currently learning)

CERTIFICATIONS / COURSES

Harvard – CS50 Introduction to Computer Science (2025)

Intensive course covering algorithms, data structures, memory management, C, Python, SQL, and web development. Focused on computational thinking and problem-solving through hands-on projects and weekly challenges.

Fortinet – Network Security Expert (2025)

Professional certification program focused on enterprise cybersecurity. Includes firewall configuration, threat detection, secure network design, and best practices for protecting digital infrastructure.

Boomi - Professional Integration Developer(2026)

Professional certification focused on enterprise data integration and workflow automation using Dell Boomi. Covers ETL concepts, API integration, data mapping, process orchestration, and cloud-based system connectivity.

PI institute– Python Essentials (2026)

Foundational Python certification covering core programming concepts, data structures, control flow, functions, and scripting for software development and automation.

Microsoft - Use AI-assisted coding with GitHub Copilot (2026)

Use GitHub Copilot to write, review, and understand code faster. Learn the basics, apply it to real tasks, and improve code quality.

Oracle - Cloud Infrastructure Foundations (2026)

Professional certification program focused on Oracle Cloud Infrastructure. Covers fundamental cloud concepts, core OCI services, security, networking, and cost management. Provides essential skills to design, deploy, and manage enterprise workloads in Oracle Cloud.
